

**Hi, I'm Climate Toothpaste.** I want to connect you with climate advocacy groups in your area. A lot of people are concerned about climate change, but feel overwhelmed by the problem, and they don't know where to turn. **Good news:** amazing groups are already working on solutions! I'm here to help you learn about these groups, so you can find a fit.

**Here's a text you can use to introduce yourself:**  
*I'm concerned about climate change and am learning how to be involved with climate solutions/carbon pricing initiatives/conservation. Can you tell me about your group and what you do?*

## OKLAHOMA

**Did you know?** U.S. Senator James Inhofe (R) OK, is the Chair of the Senate Committee of Environment and Public Works. He is a steadfast climate change denialist.

## Pricing Carbon

**Citizens Climate Lobby**  
[www.citizensclimatelobby.org](http://www.citizensclimatelobby.org)

Citizens Climate Lobby is an international organization that is trying to pass legislation for a national carbon fee and dividend. What's missing from climate change? Political will. CCL creates that political will by educating about climate change. CCL has one chapter in Norman.

## Conservation/Climate/Fracking

**Sierra Club**  
[johnson.bridgewater@sierraclub.org](mailto:johnson.bridgewater@sierraclub.org)

Sierra Club protects wilderness, helped pass the Clean Air Act, the Clean Water Act, and the Endangered Species Act. The Oklahoma chapter has protected Oklahoma's wildlife, preserved its natural resources, and educated the public on many issues at the local, state, and federal level. Whether you are interested in backyard gardening, canoe trips, or grassroots lobbying, the Oklahoma Chapter of the Sierra Club welcomes you to the oldest and largest environmental organization in the nation.

## Fracking in Oklahoma

The Sooner State has gone from two earthquakes a year before 2009 to two a day, making it the earthquake capital of the world. Scientists concluded in April 2015 that the injection of wastewater byproducts into deep underground disposal wells from fracking operations have triggered the near-daily quakes. The Sierra Club is leading the anti-fracking charge with an active lawsuit, which you can read about here: <http://www.sierraclub.org/oklahoma>

## OTHER NATIONAL GROUPS

### Climate/Environment

**350.org** [www.350.org](http://www.350.org)

A global grassroots climate movement that holds leaders accountable to the realities of science and the principles of justice. Through online campaigns, grassroots organizing, and mass public actions, 350 brings together a global network in over 188 countries. There are

no chapters of 350.org in Oklahoma yet.

## Climate Mobilization

**The Climate Mobilization**  
[www.theclimatemobilization.org](http://www.theclimatemobilization.org)

Climate change presents us each with a fundamental choice. Will we be passive as civilization slowly collapses around us? Or will we mobilize and fight back for a 100% clean energy future? The Climate Mobilization believes we need a WWII-scale national mobilization to fight climate change.
