

Hi, I'm Climate Toothpaste. I want to connect you with climate advocacy groups in your area. A lot of people are concerned about climate change, but feel overwhelmed by the problem, and they don't know where to turn. **Good news:** amazing groups are already working on solutions! I'm here to help you learn about these groups, so you can find a fit.

Here's a text you can use to introduce yourself:
I'm concerned about climate change and am learning how to be involved with climate solutions/carbon pricing initiatives/conservation. Can you tell me about your group and what you do?

LOUISIANA

Pricing Carbon

Citizens Climate Lobby
www.citizensclimatelobby.org

Citizens Climate Lobby is an international organization trying to pass legislation for a national carbon fee and dividend. What's missing from climate change? Political will. CCL creates that political will by educating about climate change. CCL has chapters in New Orleans, Baton Rouge and Sulphur.

Climate/Environment

350.org www.350.org
 A global grassroots climate movement that holds leaders accountable to the realities of science and the principles of justice. Through online campaigns, grassroots organizing, and public actions, 350 brings together a global network in 188 countries. 350 has groups in New Orleans and Shreveport.

Climate/Environment/Conservation

Sierra Club
www.sierraclub.org/wisconsin/local-groups

The Delta Chapter is 3,000 of your neighbors supporting the work of the Sierra Club in Louisiana. We advance the cause of protecting Louisiana's environment by sponsoring a campaign to take Mercury out of the environment, identifying and protecting the state's scenic rivers, and working to save the cypress and keep the Atchafalaya Basin, America's greatest river swamp, wet and wild.

Climate/Environment

Louisiana Environmental Action
www.lean.org

The Louisiana Environmental Action Network (LEAN) is a community based not-for-profit organization that has been working since 1986 to resolve the unique environmental struggles present in Louisiana. Through education, empowerment, advocacy, and support; LEAN provides the necessary tools and services to individuals and communities facing environmental problems. Problems that often threaten their health, safety and quality of life.

Other Louisiana groups: 21 other Louisiana environmental groups are listed on this website: <http://www.eco-usa.net/orgs/la.shtml>

Climate Mobilization

The Climate Mobilization
www.theclimatemobilization.org

Climate change presents us each with a choice. Will we be passive as civilization slowly collapses around us? Or will we mobilize and fight back for a 100% clean energy future? The Climate Mobilization believes we need a WWII-scale national mobilization to fight climate change.

Other national groups:
americansagainstfracking.org

At the current rates that the sea is rising and land is sinking, National Oceanic and Atmospheric Administration scientists say by 2100 the Gulf of Mexico could rise as much as 4.3 feet across this landscape, which has an average elevation of about 3 feet. If that happens, everything outside the protective levees – most of Southeast Louisiana – would be underwater.
